

Eagle Pneumatic Type I and Type II Stations

The Eagle Pneumatic Type I and Type II stations represent our Basic Air-Lift Systems, our most cost-effective and easiest pneumatic tube delivery systems to install. These pressure/pressure systems transport items between two similar send/receive stations through a single, interconnecting tube.

Both Type I and Type II stations are produced with internal air turbos that push the carrier to the receiving station.

While the Eagle Pneumatic Type I station is ideal for narrow and taller mounting areas, the Type II station fits into more compact locations. Both stations are manufactured from heavy steel for reliability and durability.

Both Type I and Type II stations are designed for a wide range of industrial, commercial and retail applications. Call your Eagle Pneumatic dealer today.

Eagle Pneumatic Type I and Type II Stations

Type I Station

DIMENSIONS

System Size	3"	4"	6"
A	9 1/4"	10 1/4"	12 1/4"
B	28 1/4"	34 1/4"	46 5/8"
C	4 3/4"	4 3/4"	4 3/4"
D	10 1/8"	11 1/8"	11 1/8"
E	4 5/8"	5 1/8"	6 1/8"
F	4 3/4"	5 5/8"	5 1/2"
G	1 7/8"	1 7/8"	1 7/8"
H	3/4"	3/4"	3/4"

ELECTRICAL REQUIREMENTS

Power, all models: 115V, single-phase, 60Hz
U.L. Approved

DOWN SEND STATIONS AVAILABLE
