

Eagle Pneumatic T-110 Drive-Thru System

Eagle Pneumatic's T-110 Drive Thru System is a dependable Overhead vacuum-vacuum pneumatic tube system providing a secure easy way to transfer cash, paperwork or prescriptions.

Manufactured for versatility the T-110 is available in 4.5" steel or PVC tubing. The system can also be built to accommodate 4" steel tubing. The T-110 has a slim design allowing for installation into a variety of narrow islands.

The slide gate eliminates the need for external doors at both the Customer and Teller stations. Installation of remote blowers above each station create a quiet operating system and smooth delivery of the carrier.

Standard features of the unit include a stainless steel construction with a powder coated top and pedestal. The front panel has a key lock allowing for easy access to the interior of the unit. This Drive-Thru System is ideal for new installation or replacement of existing systems.

The T-110 comes equipped with a 7" video display window. There are multiple communication options for the unit including audio only and 1 or 2 way video.
